INTRODUCTION

In view of the winds of change blowing in India towards the startup culture and the Government of India’s vehicle, Make in India, Startup India, a course has been developed so as to enable the technical institutes to orient their teaching towards entrepreneurship, Innovation aspects and also Incubation.

IIT Bombay has taken Innovation, Entrepreneurship, and Incubation activities to the next level, and has transformed these thoughts into practice. Society for Innovation and Entrepreneurship (SINE), set up 12 years ago, has begun to turn out entrepreneurial success stories. The Institute has initiated a Minor degree programme in Entrepreneurship while the rich academic and research culture is coming out with unique ideas of new products or services.

The course on offer will share with the participants, the outcome of above mentioned various activities, in terms of teaching of Entrepreneurship, forming a venture around an idea, as well as creating an Incubation center in the institute or university. The course will also expose the participants to the ecosystem or the enabling mechanisms on the IIT Bombay campus which motivate students to come out with innovative ideas. Various entities on the IIT Bombay campus, like the Center for Entrepreneurship, Tata Center, Betic, Proof of Concept Laboratory, E-cell and SINE as the Incubator on campus, have contributed over a period of time towards this ecosystem. The course will make the attendee think about what kind of ecosystem their institute has and how can such an ecosystem be developed in the same.

COURSE CONTENTS

1. Overview of the innovation system at an Academic institute
2. Entrepreneurship teaching as an Academic Exercise, various courses taught, sharing of experiences.
3. Incubation Centre - formation, rules, processes, good practices, experiences, writing a Business Plan.
4. Understanding Student Ventures
5. Visit to various Centres in IIT Bombay
6. Tata Entrepreneurs, Faculty members as Entrepreneurs
7. Tata Centre - how do they work, various projects, functioning
8. E-cell - functioning, activities, contribution to the ecosystem

A Certificate of participation will be awarded to all the participants of the course.
